Professional Summary

Motivated Engineering student with strong interest in Data Structures, Algorithms, and Software Development. Experienced in solving algorithmic problems and building full-stack applications. Seeking opportunities to apply programming and problem-solving skills in software development or backend engineering roles.

Education

B.Tech in Electronics and Telecommunication 2024 – 2028
Sardar Patel Institute of Technology, Mumbai University **CGPA: 8.65 / 10**

Skills

- **Programming Languages:** C++, C
- **Frameworks/Libraries:** React, Next.js, Node.js, Express.js, Mongoose
- **Databases:** MongoDB, PostgreSQL, SQL
- **Tools & Technologies:** Git, GitHub, VS Code, REST APIs, WebSockets, Authentication, Role-Based Access Control
- **Other Skills:** Competitive Programming, Data Structures and Algorithms, Object Oriented Programming

Experience

ESDS Software Solution Ltd June 2026 – July 2026
Software Development Intern

- Developed an employee management module using **Next.js, TypeScript, and MongoDB**.
- Designed database schemas using **Mongoose** for efficient data management.
- Implemented **authentication and role-based access control** to secure application features.
- Built **REST APIs** and integrated backend services with frontend components.

Projects

Human Resource Management System (HRMS) GitHub 2026

- Developed a full-stack **role-based HRMS platform** supporting Admin, Manager, and Employee workflows for employee management, attendance, leave, payroll, goals, recruitment, and dashboards.
- Implemented **NextAuth authentication, JWT sessions, bcrypt password hashing, and role-based access control** with middleware-protected routes.
- Built modular **RESTful APIs** using MongoDB and Mongoose for employee profiles, leave/WFH/comp-off requests, payroll, goals, meetings, and recruitment workflows.
- Integrated **Socket.IO** for real-time chat and communication, along with dashboard analytics and calendar-based HR management.
- **Tech Stack:** Next.js, React, TypeScript, MongoDB, Mongoose, NextAuth, JWT, Socket.IO

Investor–Startup Matching Platform GitHub 2026

- Developed a platform connecting startup founders with investors based on industry, funding stage, and investment preferences.
- Implemented a machine learning-based matching system generating a **match percentage score** to recommend suitable investors.
- Built scalable **RESTful backend APIs** using Node.js, Express.js, and TypeScript with PostgreSQL and Prisma ORM.
- Integrated **WebSockets** to enable real-time communication between founders and investors.
- **Tech Stack:** Node.js, Express.js, TypeScript, PostgreSQL, Prisma, WebSockets, Machine Learning

Achievements

- Secured **Second Runner Up** position in VEGA Hackathon.

Positions of Responsibility

- **Teach-Head** at Students Developers Club.
